

**Voluntary product recall for safety reviews
BMC TIMEMACHINE 01 (Model years 2017 and 2018)**

Dear BMC customer

BMC issues safety review recall for TIMEMACHINE 01 model year 2017 and 2018

We have identified a technical issue on the TIMEMACHINE 01 relating to the front wheel and frame, which now needs to be inspected by a dealer. When using certain tire widths, the distance between the front tire and the down tube may fail to meet the required safety tolerance. In the event of contact between the tire and frame, this could cause the rider to crash. To date, only a very small number of incidents have been reported. TIMEMACHINE 02 models are not affected by this recall.

Out of concern for riders' safety and in keeping with BMC's high standards, BMC is issuing a recall of all 2017 and 2018 model year TIMEMACHINE 01 bikes to be returned to dealers for a safety review of the front wheel and tire.

The next step: All owners of a TIMEMACHINE 01 should immediately stop riding their bike due to the safety concerns and major risk of injury! Please contact your BMC dealer as soon as possible and take your TIMEMACHINE 01 in for a check. After reviewing the recalled TIMEMACHINE 01, the BMC dealer will register the bike with BMC as having undergone review. The bike will then either be available for immediate use once more, or your dealer will carry out free repair work so that you can ride your bike safely again.

If you have any concerns or queries regarding the recall, or if you're uncertain about whether your bike is included in the recall, please check the BMC website for more information or go directly to your dealer. To find your nearest BMC dealer, check www.bmc-switzerland.com

On the website we've also compiled an Q&A dealing with the most important questions and providing the most up-to-date information on the safety reviews of the TIMEMACHINE 01. These can be read here: www.bmc-switzerland.com/recalls-and-safety

BMC Switzerland AG would like to apologise deeply for this inconvenience and thanks you for your understanding.
